

QUALITY, ENVIRONMENT AND HEALTH AND SAFETY POLICY

VALLS QUÍMICA S.A., company dedicated to the **purification of chemical products, regeneration of solvents** through distillation processes, **waste management and commercialization of chemical products and solvents**, considers quality, environmental protection, and workers' safety as three essential factors for the success and development of the company.

In order to achieve this purpose, the company's management is committed to provide the technical means and resources necessary to:

- The service performed meets the specified requirements and satisfies the needs of the client and interested parties.
- The quality, environmental and occupational health and safety management system is constantly subject to reviews and improvement actions in order to increase its effectiveness and comply with the established requirements.

In health and safety area, requirements related to PPE, machine safety, emergency preparedness, accident and incident management, ergonomics, handling of waste and chemicals, fire protection, among others.

In environmental area, requirements related to GHG emissions, energy efficiency, renewable energies, decarbonization, water protection and consumption, air quality, sustainable resource management, waste reduction, reuse and recycling, biodiversity of fauna and flora, soil quality, noise emissions, among others.

- The quality, environment and occupational health and safety management system ensures that the necessary objectives are established for continuous improvement through compliance with current legislation, regulations, and internal requirements.
- Promote and maintain a positive health and safety and environmental protection culture with our customers, suppliers, authorities, and neighbouring community.
- Involve all our employees and organizations that develop their activity on behalf of VALLS QUÍMICA S.A. in the respect and compliance with our quality, environmental and occupational health, and safety policy.
- Identify, evaluate, and eliminate or minimize hazards and reduce risks, as well as potential environmental impacts, arising from the internal activity of the company.
- Provide safe and healthy working conditions to prevent injuries and deterioration of the health of employees of VALLS QUÍMICA S.A. and those who perform work in our facilities.
- Plan preventive activity, setting objectives and including the measures and resources to be established.
- Increase the involvement, consultation, participation, collaboration and coordination of middle management, workers, workers' representatives, and subcontracted activities, integrating prevention in all their daily activities.
- Provide training and technical/preventive information for our employees and subcontractors.

VALLS QUÍMICA S.A. establishes as a reference a Quality Management framework based on the UNE-EN ISO 9001 standard, Environmental Management based on the UNE-EN ISO 14001 standard, and Health and Safety Management based on the ISO 45001 standard.
